Figure 1 displays four maps of the Republic of Serbia, illustrating the spatial distribution of COVID-19 cases over time. The maps are arranged in a 4x4 grid, with the date of the data collection indicated in the top-left corner of each map. The dates are: 2021 8 23 9, 2021 10 18 9, 2021 10 28 9, and 2021 11 26 9. The maps show a clear progression of the pandemic, with the number of cases (represented by red dots) increasing significantly over time, particularly in the central and southern regions of the country.
